**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1711

1. Claims 6-9 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicants have failed to provide adequate support for the claimed features of the disperser. It is requested that applicants indicate where support exists for each feature of the claimed disperser. It is unclear where support exists for the last two lines of claims 6 and 8.

2. Claims 6-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what is meant by the language, "said openings communicating with one end of a pipe".

The exact meaning of the last two lines of claims 6 and 8 is unclear. It cannot be determined if the mixture is being pumped into the open end of the sleeve and the pipe at the same time or if the language is intended to mean that the mixture is pumped into either the open end of the sleeve or the pipe and then the mixture flows out of the pipe or sleeve, respectively.

3. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear how openings differ from holes. It is questioned if applicants intended "holes" to be "slots".

4. Claims 6-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Within a2i), it is unclear with respect to what required limitations are set forth by the "can be" language. It is unclear if the language provides for the openings being completely "open".

5. The disclosure is objected to because of the following informalities: The graph within Figure 5 appears to be incorrect and incomplete. Appropriate correction is required.
